Filing Date: 12/08/2003  
First Named Inventor: Dax Carter  
Art Unit: 2872  
Examiner: \_\_\_\_\_

Information Disclosure Statement

Sir:

Attached are completed Forms PTO/SB/08a & PTO/SB/08b and copies of the pertinent parts of the references cited thereon. If permissible, I would like to add the following comments which were not included in my present application, normally under the heading "Description of Prior Art". Following are comments on differences between the LaViola patent, no. 5,943,175 and my present application, no. 10/730,384. Also included are comments on differences between LaViola's device on his website, [www.hindsighthuntingmirror.com](http://www.hindsighthuntingmirror.com), and my present application, no. 10/730,384.

LaViola, in his patent, no. 5,943,175, shows a mirror device attached to a bendable shaft. The mirror device can be slid on the bendable shaft for positioning. This leaves the length of the bendable shaft protruding through the mirror.

LaViola, on his website, [www.hindsighthuntingmirror.com](http://www.hindsighthuntingmirror.com), shows a hunting mirror device that uses a telescoping shaft rather than a bendable shaft. This eliminates the shaft protruding through the mirror, as in his patent no. 5,943,175, while allowing the adjustability of length. However, though it allows for the lengthening and shortening of the mirror device, the range of positioning and adjustability are reduced.

None of these references shows a hunting mirror device which uses a flexible

shaft that is bendable in multiple positions and which shaft allows for shortening or lengthening to accommodate multiple hunting positions.

Very respectfully,

Applicant: 

Enc.: PTO/SB/08a & 08b & References

Approved for use through 07/31/2006. OMB 0651-0031

U.S. Patent and Trademark Office: U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.
